

# Use Case Presentation

HOW WE ASSISTS  
PRODUCT DEVELOPMENT TEAMS  
DO THEIR BEST WORK WITH A  
PROJECT MANAGEMENT (PM) TOOL

# Use Case: Product Development Teams

GOALS AND CHALLENGES: WHY A PM SOLUTION IS NEEDED

- Workflow and project management
- Manage client assignments in PM tool, and capture details for project delivery. As well as managing teams in different via a central project management system
- Time wasted on rushing projects, Lack of communication, Accountability, Sharing (edit permissions), eMail reminders and notifications

# Template Needs

## PROCESS STEPS AND CAPABILITIES

### MATERIALS HANDLING PROJECT TEMPLATE

Materials Handling is a stage gate process which involves initiation/Kick-Off, Planning, Execution, Monitoring, Launch

### PRODUCT LAUNCH TEMPLATE

Product Launch process is initiated based on work orders (i.e. SKUs)

# Use Case Benefits

## KEY POINTS

- Scheduling projects and measure effect of delays
  - Process Improvement with regards to new product development
  - Keeping project information together and updated for Reports, per department to Executives to review
- 

## Measure of Success

- Establish internal request tracking and reporting
- Tracking the total number of products with production which are in process, as well as project / products status within our design process
- Smoother, efficient Manufacturing process leading to more time efficient delivery with the help of accurate timelines
- Reduce overall meeting times for product launch, and meeting participation by 30%

# Product Development Teams

## SAMPLE CUSTOMERS

### SAMPLE #1

- Set up Request Forms, Project templates, and Folder structure
- Better workflow, Office and Project management
- Tracking ongoing work more efficiently and better balance resources to meet customer expectations

### SAMPLE #2
